

Keys for selecting tools

Use these shortcuts in the Tools panel. In most cases, you can momentarily switch tools by holding down the keyboard shortcut for the tool.

Result	Windows	Mac OS
Selection tool	V	V
Rotation tool	W	W
Camera tools (Orbit, Track XY, and Track Z)	C or Shift + C to select and cycle through tools	C or Shift + C to select and cycle through tools
Brush, Clone Stamp, and Eraser tool	Ctrl + B to select and cycle through tools	Command + B to select and cycle through tools
Hand tool	H, or hold down spacebar	H, or hold down spacebar
Zoom tool	Z. With the Zoom In tool selected, hold Alt to select the Zoom Out tool.	Z. With the Zoom In tool selected, hold Option to select the Zoom Out tool.
Pan Behind tool	Y	Y
Mask tools (Rectangular and Elliptical)	Q or Shift + Q to select and cycle through tools	Q or Shift + Q to select and cycle through tools
Type tools (Horizontal and Vertical)	Ctrl + T to select and cycle through tools	Command + T to select and cycle through tools
Pen tools (Add Vertex, Delete Vertex, and Convert Vertex)	G to select and cycle through tools. Hold down Ctrl to switch between the Pen tool and Selection tool.	G to select and cycle through tools. Hold down Command to switch between the Pen tool and Selection tool.

Keys for working with settings

You can find most keyboard shortcuts in menu commands and tool tips. Additional shortcuts appear in the table below.

Result	Windows	Mac OS
Open Project Settings dialog box	Ctrl + Alt + Shift + K	Command + Option + Shift + K
Restore default preferences settings	Hold down Alt + Ctrl + Shift while starting After Effects	Hold down Option + Command + Shift while starting After Effects

Keys for using footage items

Use these shortcuts in the Project panel.

You can find most keyboard shortcuts in menu commands and tool tips. Additional shortcuts appear in the table below.

Result	Windows	Mac OS
Open selected footage item or composition	Double-click or Enter on numeric keypad	Double-click or Enter on numeric keypad
Open movie in an After Effects footage panel	Alt + double-click	Option + double-click
Activate most recent composition	\	\
Add selected item to most recently activated composition	Ctrl + /	Command + /
Replace a selected layer's source footage in Composition panel with selected footage	Ctrl + Alt + /	Command + Option + /
Replace a selected layer's source footage item or composition in the Timeline panel	Alt-drag footage item from Project panel into composition	Option-drag footage item from Project panel into composition
Delete a footage item without a warning dialog box appearing	Ctrl + Backspace	Command + Delete

Keys for viewing panels

You can find most keyboard shortcuts in menu commands and tool tips. Additional shortcuts appear in the table below.

Result	Windows	Mac OS
Display/hide title-or action- safe zones	' (apostrophe)	' (apostrophe)
Display/hide proportional grid	Alt + ' (apostrophe)	Option + ' (apostrophe)
Suspend image updates	Caps Lock	Caps Lock
Take multiple (up to four) snapshots	Shift + F5, F6, F7, and F8	Shift + F5, F6, F7, and F8
Display snapshot in active panel	F5, F6, F7, and F8	F5, F6, F7, and F8
Display channel (RGBA)	Alt + 1, 2, 3, or 4	Option + 1, 2, 3, or 4
Display channel (RGBA) in color	Alt + Shift + 1, 2, 3, or 4	Option + Shift + 1, 2, 3, or 4
Close active tab or panel	Ctrl + W*	Command + W*
Toggle Graph Editor	Shift + F3	Shift + F3
Display footage file name in Info panel	Ctrl + Alt + E	Command + Option + E
Maximize panel	Tilde (don't press the Shift key)	Tilde (don't press the Shift key)
Reset view in the Composition panel to 100% and center composition in the panel	Double-click Hand tool	Double-click Hand tool
Zoom in	. (period) or Ctrl + = on main keyboard	. (period) or Command + = on main keyboard
Zoom out	, (comma) or Ctrl + - (hyphen) on main keyboard	, (comma) or Command + - (hyphen) on main keyboard
Zoom to 100%	/ (on main keyboard)	/ (on main keyboard)

Resize application window or floating window to fit screen. (Press again to resize window so that contents fill the screen.) Ctrl + \ (backslash) Command + \ (backslash)

*If there is content in the Composition, Layer, Footage, or Effect Controls panel, this shortcut closes the content before closing the panel.

Keys for moving around the Timeline panel

You can find most keyboard shortcuts in menu commands and tool tips. Additional shortcuts appear in the table below.

Result	Windows	Mac OS
Go to beginning of the work area	Shift+Home	Shift+Home
Go to end of the work area	Shift+End	Shift+End
Go to previous visible keyframe or layer-time marker	J	J
Go to next visible keyframe or layer-time marker	K	K
Go to a composition time marker	0 - 9 on main keyboard	0 - 9 on main keyboard
Scroll selected layer to top of the Timeline panel	X	X
Scroll current time to center of panel while zoomed	D	D
Zoom out time	-	-
Zoom in time	=	=

Keys for moving around panels

Use these shortcuts in the Composition, Timeline, Layer, and Footage panels.

You can find most keyboard shortcuts in menu commands and tool tips. Additional shortcuts appear in the table below.

Result	Windows	Mac OS
Go to the beginning of a composition	Home or Ctrl + Alt + Left Arrow key	Home or Command + Option + Left Arrow key
Go to the end of a composition	End or Ctrl + Alt + Right Arrow key	End or Command + Option + Right Arrow key
Step forward 1 frame	Page Down or Ctrl + Right Arrow key	Page Down or Command + Right Arrow key
Step forward 10 frames	Shift + Page Down or Shift + Ctrl + Right Arrow key	Shift + Command + Right Arrow key or Shift + Page Down
Step backward 1 frame	Page Up or Ctrl + Left Arrow key	Page Up or Command + Right Arrow key
Step backward 10 frames	Shift + Page Up or Shift + Ctrl + Left Arrow key	Shift + Page Up or Command + Shift + Left Arrow key
Go to layer In point	i	i
Go to layer Out point	o	o
Snap items such as keyframes, time markers, and In and Out points to each other on a time ruler	Shift-drag item	Shift-drag item

Keys for previewing

Use these shortcuts in the Timeline panel.

You can find most keyboard shortcuts in menu commands and tool tips. Additional shortcuts appear in the table below.

Result	Windows	Mac OS
Start/pause playback	Spacebar	Spacebar
RAM preview	0 on numeric keypad*	0 on numeric keypad*
RAM preview every other frame	Shift + 0 on numeric keypad*	Shift + 0 on numeric keypad*
Manually preview (scrub) video	Drag or Alt-drag current-time indicator, depending on Live Update setting	Drag or Option-drag current-time indicator, depending on Live Update setting
Manually preview (scrub) audio	Ctrl-drag current-time indicator	Command-drag current-time indicator
Wireframe preview	Alt + 0 on numeric keypad*	Option + 0 on numeric keypad*
Display rectangle instead of alpha outline during wireframe preview	Ctrl + Alt + 0 on numeric keypad*	Command + Option + 0 on numeric keypad*
Leave panel contents during wireframe preview	Shift + Alt + 0 on numeric keypad*	Shift + Option + 0 on numeric keypad*
Leave panel contents during rectangle preview	Ctrl + Shift + Alt + 0 on numeric keypad*	Command + Shift + Option + 0 on numeric keypad*
Show current frame on output device specified in Video Preview preferences	/ on numeric keypad	/ on numeric keypad.
Toggle Output Device preference between Desktop Only and previously specified output device	Ctrl + / on numeric keypad	Command + / on numeric keypad

*Make sure Num Lock is on.

Keys for nudging layers

Use these shortcuts in the Composition and Timeline panels.

You can find most keyboard shortcuts in menu commands and tool tips. Additional shortcuts appear in the table below.

Result	Windows	Mac OS
Nudge layer 1 pixel in specific direction	Arrow key	Arrow key
Nudge layer 1 frame earlier	Alt + Page Up	Option + Page Up
Nudge layer 1 frame later	Alt + Page Down	Option + Page Down
Nudge layer rotation +1°	+ (plus) on numeric keypad	+ (plus) on numeric keypad
Nudge layer rotation -1°	- (minus) on numeric keypad	- (minus) on numeric keypad
Nudge layer scaling +1%	Ctrl + + (plus) on numeric keypad	Option + + (plus) on numeric keypad
Nudge layer scaling -1%	Ctrl + - (minus) on numeric keypad	Option + - (minus) on numeric keypad
Nudge layer scaling +10%	Ctrl + Shift + + (plus) on numeric keypad	Option+ Shift + + (plus) on numeric keypad
Nudge layer scaling -10%	Ctrl + Shift + - (minus) on numeric keypad	Option + Shift + - (minus) on numeric keypad

Keys for using layers

Use these shortcuts in the Composition and Timeline panels.

You can find most keyboard shortcuts in menu commands and tool tips. Additional shortcuts appear in the table below.

Result	Windows	Mac OS
Rename layer, composition, folder, or effect	Enter (on main keyboard)	Return
Send layer backward	Ctrl + Alt + Down Arrow key	Command + Option + Down Arrow key
Bring layer forward	Ctrl + Alt + Up Arrow key	Command + Option + Up Arrow key
Send layer to back	Ctrl + Shift + Alt + Down Arrow key	Command + Shift + Option + Down Arrow key
Bring layer to front	Ctrl + Shift + Alt + Up Arrow key	Command + Shift + Option + Up Arrow key
Select a layer by its layer-outline number	Layer number on numeric keypad*	Layer number on numeric keypad*
Select non-contiguous layers	Ctrl-click layers	Command-click layers
Select contiguous layers	Shift-click layers	Shift-click layers
Deselect all layers	F2	F2
Activate Composition panel with layer	\	\
Display selected layer in Layer panel	Enter (on numeric keypad)	Enter (on numeric keypad)
Display Effect Controls panel for selected layers	Ctrl + Shift + T	Command + Shift + T
Open source of a layer	Alt-double-click a layer	Option-double-click a layer
Constrain layer movement along x axis or y axis	Shift-drag layer (begin dragging before pressing key)	Shift-drag layer (begin dragging before pressing key)

Set In point	[(left bracket)	[(left bracket)
Set Out point] (right bracket)] (right bracket)
Trim In point of a layer	Alt + [(left bracket)	Option + [(left bracket)
Trim Out point of a layer	Alt +] (right bracket)	Option +] (right bracket)
Add/remove expression	Alt-click a property stopwatch in the Effect Controls or Timeline panel	Option-click a property stopwatch in the Effect Controls or Timeline panel
Add an effect (or multiple selected effects) to selected layers	Double-click an effect in the Effects & Presets panel	Double-click an effect in the Effects & Presets panel
Set In point by time-stretching	Ctrl + Shift + , (comma)	Command + Shift + , (comma)
Set Out point by time-stretching	Ctrl + Alt + , (comma)	Command + Option + , (comma)
Move In point to beginning of composition	Alt + Home	Option + Home
Move Out point to end of composition	Alt + End	Option + End
Constrain rotation to 45° increments	Shift-drag Rotation tool	Shift-drag Rotation tool
Constrain scaling to footage frame aspect ratio	Shift-drag layer handle with Selection tool	Shift-drag layer handle with Selection tool
Reset rotation angle to 0°	Double-click Rotation tool	Double-click Rotation tool
Reset scale to 100%	Double-click Selection tool	Double-click Selection tool
Change property value by 10	Shift-drag underlined values in Switches/Modes column	Shift-drag underlined values in Switches/Modes column
Change property value by .10	Ctrl-drag underlined values in Switches/Modes column	Command-drag underlined values in Switches/Modes column
Set all dimensions to same value for Scale and Mask Feather properties	Deselect Constrain Proportions option, and Alt-click to reselect option	Deselect Constrain Proportions option, and Option-click to reselect option

*Make sure Num Lock is on.

Keys for viewing layer properties

Use these shortcuts in the Timeline panel.

You can find most keyboard shortcuts in menu commands and tool tips. Additional shortcuts appear in the table below.

Note: This table contains double-letter shortcuts (for example, "LL"). To enable these shortcuts, press the letters in quick succession.

Result	Windows	Mac OS
Anchor Point	A*	A*
Audio Levels	L	L
Audio Waveform	LL	LL
Effects	E	E
Expressions	EE	EE
Mask Feather	F	F
Mask Shape	M	M
Mask Opacity	TT	TT
Mask Properties	MM	MM
Material options (3D)	AA	AA
Opacity	T**	T**
Position	P	P
Paint Effects	PP	PP
Reveal modified properties	UU	UU
Rotation	R***	R***
Time Remapping	RR	RR

Scale	S	S
Set layer property value in dialog box (works with P, R, F, and M)	Ctrl + Shift + property shortcut	Command + Shift + property shortcut
Show all animating values	U	U
Show selected properties	SS	SS
Hide property or category	Alt + Shift-click property or category name	Option + Shift-click property or category name
Display/hide Parent column	Shift + F4	Shift + F4
Add/remove property	Shift + property shortcut	Shift + property shortcut
Toggle switches/modes	F4	F4
Turn off all other solo switches	Alt-click solo switch	Option-click solo switch
Zoom to or from frame view	; (semicolon)	; (semicolon)
Zoom in time	= on main keyboard	= on main keyboard
Zoom out time	- (hyphen) on main keyboard	- (hyphen) on main keyboard

*For light and camera layers, this shortcut displays the Point Of Interest property.

**For light layers, this shortcut displays the Intensity property.

***For light and camera layers, this shortcut displays the Orientation property.

Keys for working with the Composition panel

You can find most keyboard shortcuts in menu commands and tool tips. Additional shortcuts appear in the table below.

Result	Windows	Mac OS
Set composition resolution to custom	Ctrl + Alt + J	Command + Option + J

Keys for modifying keyframes

Use these shortcuts in the Timeline panel.

You can find most keyboard shortcuts in menu commands and tool tips. Additional shortcuts appear in the table below.

Result	Windows	Mac OS
Add or remove keyframe (if stopwatch is on) or turn on time-vary stopwatch	Alt + Shift + property display shortcut	Option + Shift + property display shortcut
Select all keyframes for a property	Click property name	Click property name
Deselect all keyframes	Shift + F2	Shift + F2
Snap keyframe to significant times	Shift-drag keyframe	Shift-drag keyframe
Nudge keyframe 1 frame forward	Alt + Right Arrow key	Option + Right Arrow key
Nudge keyframe 1 frame backward	Alt + Left Arrow key	Option + Left Arrow key
Select all visible keyframes and properties	Ctrl + Alt + A	Command + Option + A
Go to previous keyframe	J	J
Go to next keyframe	K	K
Switch interpolation between Linear and Auto Bezier	Alt-click keyframe (Graph Editor) or Ctrl-click keyframe (Layer Bar mode)	Option-click keyframe (Graph Editor) or Command-click keyframe (Layer Bar mode)
Change Auto Bezier interpolation to Continuous Bezier	Drag keyframe handle	Drag keyframe handle
Toggle between Continuous Bezier and Bezier interpolation	Alt-drag keyframe handle (Graph Editor) or Ctrl-drag keyframe (Layer Bar mode)	Option-drag keyframe handle (Graph Editor) or Command-drag keyframe (Layer Bar mode)
Easy ease	F9	F9
Easy ease in	Shift + F9	Shift + F9

Easy ease out	Ctrl + Shift + F9	Command + Shift + F9
Deselect selected keyframes and animator groups and leave their layers selected	Ctrl + Alt + Shift + A	Command + Option + Shift + A
Go to the next In or Out point	Ctrl + Shift + Alt + Right Arrow key	Command + Shift + Option + Right Arrow key
Go to the previous In or Out point	Ctrl + Shift + Alt + Left Arrow key	Command + Shift + Option + Left Arrow key

Keys for working with the Graph Editor

You can find most keyboard shortcuts in menu commands and tool tips. Additional shortcuts appear in the table below.

Result	Windows	Mac OS
Select all keyframes	Alt-click segment between two keyframes with Selection tool	Option-click segment between two keyframes with Selection tool
Move all keyframes	Alt-drag segment between two keyframes with Selection tool	Option-drag segment between two keyframes with Selection tool
Switch to Convert Vertex tool, separate direction handles, and move them independently	Alt-drag a direction handle with Selection or Pen tool	Option-drag a direction handle with Selection or Pen tool
Switch to Convert Vertex tool and toggle keyframe interpolation	Alt-click a keyframe with Selection or Pen tool	Option-click a keyframe with Selection or Pen tool
Draw new direction handles	Alt-drag a keyframe with Selection tool	Option-drag a keyframe with Selection tool
Switch to Pen tool and add keyframe	Ctrl-click a segment between two keyframes with Selection tool	Command-click a segment between two keyframes with Selection tool
Switch to Pen tool and delete keyframe	Ctrl-click a keyframe with Selection tool	Command-click a keyframe with Selection tool
Toggle selection of two neighboring keyframes	Shift-click a segment between two keyframes with Selection tool	Shift-click a segment between two keyframes with Selection tool
Toggle keyframe selection	Shift-click a keyframe with Selection tool	Shift-click a keyframe with Selection tool
Constrain movement of keyframe vertically or horizontally	Shift-drag a keyframe with Selection tool	Shift-drag a keyframe with Selection tool
Constrain movement of direction handle horizontally	Shift-drag a direction handle with Selection tool	Shift-drag a direction handle with Selection tool
Switch to Selection tool	Ctrl-click segment, keyframe, or direction handle with Pen or Convert Vertex tool	Command-click segment, keyframe, or direction handle with Pen or Convert Vertex tool
Create new keyframe and extend direction handles horizontally	Shift-drag a segment with Pen tool	Shift-drag a segment with Pen tool

Keys for setting the work area

Use these shortcuts in the Timeline panel.

You can find most keyboard shortcuts in menu commands and tool tips. Additional shortcuts appear in the table below.

Result	Windows	Mac OS
Set beginning of work area to current time	B	B
Set end of work area to current time	N	N
Set work area to selected layers	Ctrl + Alt + B	Command + Option + B
Set work area to composition duration when no layers are selected	Ctrl + Alt + B	Command + Option + B

Keys for using masks

Use these shortcuts in the Composition and Layer panels.

You can find most keyboard shortcuts in menu commands and tool tips. Additional shortcuts appear in the table below.

Result	Windows	Mac OS
Reset oval or rectangle mask to fill frame	Double-click Rectangular or Elliptical Mask tool	Double-click Rectangular or Oval Mask tool
Scale around center point in Free Transform mode	Ctrl-drag	Command-drag
Select all points in a mask	Alt-click mask	Option-click mask
Free transform points	Ctrl + T, or double-click mask	Command + T, or double-click mask
Exit free transform points	Enter	Return
Toggle Mask Shape keyframe for selected mask shapes	Shift + Alt + M	Shift + Option + M
Toggle mask display	Ctrl + Shift + H	Command + Shift + H
Toggle between smooth and corner points	Ctrl + Alt-click point	Command+Option-click point
Redraw handles	Ctrl+Alt-drag point	Command+Option-drag point

Keys for using the Effect Controls panel

You can find most keyboard shortcuts in menu commands and tool tips. Additional shortcuts appear in the table below.

Result	Windows	Mac OS
Add keyframe for effect control	Alt-click effect property name	Option-click effect property name
Add an expression in the Timeline panel	Alt-click a property stopwatch in the Effect Controls panel	Option-click a property stopwatch in the Effect Controls panel

Keys for 3D animation

Use these shortcuts in the Composition and Timeline panels.

You can find most keyboard shortcuts in menu commands and tool tips. Additional shortcuts appear in the table below.

Result	Windows	Mac OS
View Custom View 1 (defaults to front)	F10	F10
View Custom View 2 (defaults to custom view 1)	F11	F11
View Custom View 3 (defaults to active camera)	F12	F12
Return to previous view	Esc	Esc
Move the camera and its point of interest to look at selected objects	Shift + Alt + Ctrl + \	Option + Command + Shift + \

Keys for using markers

Use these shortcuts in the Composition and Timeline panels.

You can find most keyboard shortcuts in menu commands and tool tips. Additional shortcuts appear in the table below.

Result	Windows	Mac OS
Remove layer-time marker	Ctrl-click marker	Command-click marker
Go to previous visible layer-time marker or keyframe	J	J
Go to next visible layer-time marker or keyframe	K	K
Go to a composition-time marker	0-9 on main keyboard	0-9 on main keyboard
Set and number a composition-time marker at the current time	Shift + 0-9 on main keyboard	Shift + 0-9 on main keyboard
See the duration between two layer-time markers or keyframes in the Info panel	Alt-click the markers or keyframes	Option-click the markers or keyframes

Keys for painting

You can find most keyboard shortcuts in menu commands and tool tips. Additional shortcuts appear in the table below.

Result	Windows	Mac OS
Toggle Paint panel background color and foreground colors	X	X
Set Paint panel foreground color to black and background color to white	D	D
Set foreground color to the color currently under any paint tool pointer	Alt-click	Option-click
Set foreground color to the average color of a 4 x 4 area under any paint tool pointer	Alt + Shift-click	Option + Shift-click
Set a paint tool's brush size	Ctrl-drag	Command-drag
Set a paint tool's brush hardness	Ctrl-drag, then release Ctrl while dragging	Command-drag, then release Command while dragging
Append a straight paint stroke to the last stroke	Shift + Click	Shift + Click
Set starting sample point to color currently under Clone Stamp tool pointer	Alt-click	Option-click
Select Last Stroke Only option in Paint panel for Eraser tool	Ctrl + Shift	Command + Shift
Change aligned Clone Stamp tool's Offset value or change unaligned Clone Stamp tool's Source Position value	Alt + Shift-drag	Option + Shift-drag
Duplicate a Clone Stamp tool preset in Paint panel	Alt-click the preset	Option-click the preset
Reduce a painting tool's opacity 10% at a time	Press the corresponding digit on numeric keypad (9=90%, 1=10%)*	Press the corresponding digit on numeric keypad (9=90%, 1=10%)*

Set a painting tool's flow to 100%

Shift + decimal point (.) on numeric keypad*

Shift + decimal point (.) on numeric keypad*

Reduce a painting tool's flow to 10% at a time

Press Shift + the corresponding digit on numeric keypad (9=90%, 1=10%)*

Press Shift + the corresponding digit on numeric keypad (9=90%, 1=10%)*

*Make sure Num Lock is on.

Keys for using text

You can find most keyboard shortcuts in menu commands and tool tips. Additional shortcuts appear in the table below.

Result	Windows	Mac OS
Align text left, center, or right	Horizontal Type tool + Shift + Ctrl + L, C, or R	Horizontal Type tool + Shift + Command + L, C, or R
Align text top, center, or bottom	Vertical Type tool + Shift + Ctrl + L, C, or R	Vertical Type tool + Shift + Command + L, C, or R
Select 1 character left/right, or 1 line down/up, or 1 word left/right	Shift + Left Arrow/Right Arrow, Shift + Down Arrow/Up Arrow, Shift + Ctrl + Left Arrow/Right Arrow	Shift + Left Arrow/Right Arrow, Shift + Down Arrow/Up Arrow, Shift + Command + Left Arrow/Right Arrow
Select characters from insertion point to mouse click point	Shift + click	Shift + click
Move insertion point 1 character left/right, 1 line down/up, or 1 word left/right	Left Arrow/Right Arrow, Down Arrow/Up Arrow, Ctrl + Left Arrow/Right Arrow	Left Arrow/Right Arrow, Down Arrow/Up Arrow, Command + Left Arrow/Right Arrow
Select word, line, or paragraph	Double-click, triple-click, quadruple-click, or quintuple-click	Double-click, triple-click, quadruple-click, or quintuple-click
Toggle All Uppercase on/off	Shift + Ctrl + K	Shift + Command + K
Toggle Small Caps on/off	Shift + Ctrl + Alt + K	Shift + Command + Option + K
Toggle Superscript on/off	Shift + Ctrl + + (plus)	Shift + Command + + (plus)
Toggle Subscript on/off	Shift + Alt + Ctrl + + (plus)	Shift + Option + Command + + (plus)
Choose 100% horizontal scale	Shift + Ctrl + X	Shift + Command + X
Choose 100% vertical scale	Shift + Alt + Ctrl + X	Shift + Option + Command + X
Choose Auto leading	Shift + Alt + Ctrl + A	Shift + Option + Command + A
Choose 0 for tracking	Shift + Ctrl + Q	Shift + Control + Command + Q

Justify paragraph; left aligns last line	Shift + Ctrl + J	Shift + Command + J
Justify paragraph; forces last line	Shift + Ctrl + F	Shift + Command + F
Decrease/increase type size of selected text 2 pts/px	Shift + Ctrl + < or >	Shift + Command + < or >
Decrease/increase leading 2 pts/px	Alt + Down Arrow/Up Arrow	Option + Down Arrow/Up Arrow
Decrease/increase baseline shift 2 pts/px	Shift + Alt + Down Arrow/Up Arrow	Shift + Option + Down Arrow/Up Arrow
Decrease/increase kerning or tracking 20/1000 ems	Alt + Left Arrow/Right Arrow	Option + Left Arrow/Right Arrow

Keys for working with Adobe Bridge

This is not a complete list of keyboard shortcuts. This table lists only those shortcuts that are not displayed in menu commands or tool tips.

Result	Windows	Mac OS
Open Adobe Bridge from other Creative Suite application	Control + Alt + O, Control + Shift + O	Command + Option + O, Command + Shift + O
Switch to previous Bridge window	Shift + Control + ~	Shift + Command + ~
Switches to the next view (As Thumbnails, As Filmstrip, As Details, or As Versions And Alternates)	Control + \	Command + \
Switch to user-defined workspaces	Control + F6 through Control + F12	Command + F6 through Command + F12
Switch to previous view	Shift + Control + \	Shift + Command + \
Show all files	Alt + Control + A	Option + Command + A
Show files with 1 or more stars	Alt + Control + 1	Option + Command + 1
Show files with 2 or more stars	Alt + Control + 2	Option + Command + 2
Show files with 3 or more stars	Alt + Control + 3	Option + Command + 3
Show files with 4 or more stars	Alt+Control+4	Option + Command + 4
Show files with 5 stars	Alt + Control + 5	Option + Command + 5
Show files with label 1 (red)	Alt + Control + 6	Option + Command + 6
Show files with label 2 (yellow)	Alt + Control + 7	Option + Command + 7
Show files with label 3 (green)	Alt + Control + 8	Option + Command + 8
Show files with label 4 (blue)	Alt + Control + 9	Option + Command + 9
Mark selected Version Cue file as in use	Shift + Control + M	Shift + Command + M

Synchronize local view and server view of selected Version Cue file	Shift + Control + B	Shift + Command + B
Make selected Version Cue files alternates of each other.	Shift + Control + G	Shift + Command + G
Create saved version of selected Version Cue file	Shift + Control + V	Shift + Command + V
Open Version Cue Versions dialog box	Shift + Alt + Control + V	Shift + Option + Command + V
Return to last application that launched Bridge	Alt + Control + O	Option + Command + O
Move up a folder (in folder view) or a row	Up Arrow	Up Arrow
Move down a folder (in folder view) or a row	Down Arrow	Down Arrow
Move up a level (in folder view)	Control + Up Arrow	Command + Up Arrow
Move left one item	Left Arrow	Left Arrow
Move right one item	Right Arrow	Right Arrow
Move to the first item	Home	Home
Move to the last item	End	End
Add to selection (discontiguous)	Control-click	Command-click
Refresh tree and thumbnail panes	F5	F5
Add an item to the selection	Shift + Right Arrow, Left Arrow, Up Arrow, or Down Arrow	Shift + Right Arrow, Left Arrow, Up Arrow, or Down Arrow
Rotate image clockwise	Control +]	
Rotate image counterclockwise	Control + [
Launch File Bridge in maximized state and auto-hide palettes	Control-click the Open Bridge icon in the options bar	
Open File Info dialog box	Control + Alt + Shift + I	Command + Option + Shift + I
